

APPENDIX 8 - FINDINGS OF QUANTITATIVE ASSESSMENT

Table 16 - **Borough Totals**

Typology	No. of sites	Total Area of Provision (ha)	Average Site Area (ha)	Borough Area (Ha)	% of Borough Covered	Borough Population	No. of Hectares of Provision per 1000 Population	Population per hectare of provision
Accessible Natural and Semi-Natural Greenspace	51	2876.12	56.39	27093	10.62	129701	28.26	45.10
Amenity Open Space	95	133.76	1.41		0.49		0.98	969.65
Allotment	26	28.9	1.11		0.11		0.24	4487.92
Playing Field or Park	54	249.89	4.63		0.92		2.63	519.03
Built Sports Facility	74	613.57	8.29		2.26		7.62	211.39
Cemetery	3	15.21	5.07		0.06		0.10	8527.35
Community Hall	102	4.769	0.05		0.02		0.04	27196.69 ¹
Cultural Facility	21	321.938	15.33		1.19		2.54	402.88
School Facility	69	193.14	2.80		0.71		1.71	671.54
Totals	495	4438.557	8.97		16.38		44.14	29.22

¹ This works out at 1251 people per hall

A8.1 Other Quantitative Findings and Sites

54 sites had fixed play equipment – the provision and location of fixed play equipment is comprehensively covered in the Fixed Equipment Playground Strategy 2003. However it must be noted that 54 sites is only 9% of those sites audited.

The Fixed Equipment Playground Strategy also assessed children's play spaces. The study identified that there is a huge shortage in Local Areas of Play (LAP), which cater specifically for 4-6 year olds, when required numbers based on NPFA standards are assessed against actual numbers. For LAP's there should be 1767 sites but there are only 7, for Local Equipped Areas of Play (LEAP) there should be 247 but there is only 50, for Neighbourhood Equipped Areas of Play there should be 13 but there are only 2 and 1 Premier Equipped Area of Play when there aspiration is 3. When assessed against provision per 1000 children under 12 years old provision (1.6 sites per 1000 children) is less than the Surrey average of 2.2 sites per 1000 children. But when the rural areas are also considered then this rises to 3.33 sites per 1000 children, above the Surrey average. The shortage can be explained because small parcels of land cannot always be adopted by GBC as they are un-economic to maintain.

381 sites had a cost to enter or use the site – this is 77% of sites audited. This is about what was expected as Accessible Natural and Semi Natural Greenspace and Amenity Open Space are approximately 25% of sites audited, these typologies are normally free to enter.

A8.2 Sites not Audited

The auditors were unable to audit a few of the sites as access could not be arranged, this is recorded on the database. As much quantitative data was gathered from desk based assessments as possible. No qualitative data exists for these sites. The qualitative results have been adjusted to reflect this.

Other sites that were not audited are

Linear features mainly Rights of Way, the Basingstoke Canal, the River Wey, the Tongham disused railway line, and the North Downs Way

Sites of Nature Conservation Importance were generally not audited, as there was often no access, e.g. the area of open space by the River Wey to the South of Stoke ward Site ST21 in the 1997 Open Space Survey.

A8.3 Current Open Space

The 1997 Open Space Survey identified a number of sites that should be protected open space. All of these sites were re audited. All existing protected open spaces should remain designated as they have either recreational, amenity or wildlife value.

Table 26 - Location of public sports provision by ward - The numbers in brackets are the site reference numbers given to each site audited

A8.4 Other Sports Facilities in the Borough

Two BMX tracks
Four five a side football pitches
One skate-park
Three ski slopes
One ice rink
Three shooting facilities
One rowing centre
One sub aqua, kayaking and canoeing centre
One ten pin-bowling centre
One croquet lawn
One climbing wall
One boxing club
34 Health and Fitness Centres within 8 Miles of Guildford.

The audit identified 102 community halls, 89 of which had a floor space that would provide a badminton court with a 2m buffer around it. These halls would also be big enough for other indoor activities and sports such as martial arts, yoga and dance classes. Sports, which often do not have specialist facilities, but tend to use generic facilities such as sports halls and community halls.

A8.5 Sports England Active Places

<http://www.activeplaces.com/Index.asp?Authorise=true>

There are many facilities used by residents of the borough that are not always in the borough. Sports England has identified sporting facilities around the country as part of their 'Active Places' project and has developed an on line database. This allows one to choose a sport and identify all facilities within a specified distance of a postcode.

Within 8 miles of Millmead House there are 134 sporting facilities listed on the Active Places database. This includes 2 Athletics tracks, 28 golf facilities, 64 grass sports pitches accommodating around 20 different pitch sports including cricket (11) full football pitches (50), junior football (18) hockey (2) and senior rugby (13), 1 ice rink, 1 indoor bowls, 4 indoor tennis facilities, 2 ski slopes, 22 sports halls, 24 swimming pools, and 10 all weather pitches. Although there are some gaps in the data, it is a very useful way of seeing sports provision spatially, with no arbitrary boundaries such as the borough boundary.
